Portfolio: <https://michaelfellas.github.io/Portfolio-Update/>

Full stack web developer with a background in finance to provide an all round business analyst perspective. Completed a Bachelor of Commerce majoring in Finance from Curtin University. Earning a certificate in Full Stack Web Development from the University of Western Australia Coding Boot Camp. Creative but logical problem-solver who is passionate about data and analytics with a side passion for web design and user experience. Strengths in creativity, teamwork, refactoring and building projects from the ground up.

Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, Materialize, Photoshop, Reaper, Illustrator, Premiere Pro.
Backend: NodeJS.

Projects

Marvel Fan Club | <https://github.com/HannahAB777/Marvel-Fan-Site> |

<https://hannahab777.github.io/Marvel-Fan-Site/> | Allrounder, worked mainly on the API requests, Javascript, CSS design and custom assets.

- This app takes a pre-selected group of marvel heroes that the user can choose between and displays marvel information about each character and movie information about a movie that character was in.
- This project allows Marvel fans to learn more about their favorite characters and which movies they can watch them in. Worked in a group of two to achieve this.
- Tools/Languages: HTML5, CSS, Javascript, JQuery, Photoshop, MarvelAPI, OMBDAPI, Materialize CSS framework

Weather Dashboard | <https://github.com/MichaelFellas/Weather-Dashboard> |

<https://michaelfellas.github.io/Weather-Dashboard/> | Sole Author

- This app displays the current weather and 5 day forecast for a city that the user searches.
- This app allows a user to search for a city and find the current weather and also a 5 days forecast relying on data from the Open Weather API, automatically saves the users past searches allowing a quick reload without having to search.
- Tools/Languages: HTML5, CSS, Bootstrap, OpenWeatherAPI, GoogleMapsAPI, Javascript, JQuery

Coding Quiz | <https://github.com/MichaelFellas/Coding-Quiz> | <https://michaelfellas.github.io/Coding-Quiz/> |

Sole Author

- This app tests the users knowledge of basic web dev coding skills in a gamified way.
- This project tests a user's coding knowledge, features a timer that reduces when an incorrect answer is chosen, randomly ordered questions and a high score page saved to local storage.
- Tools/Languages: Javascript, HTML 5, CSS, JQuery.
